DETAILED ACTION

Election/Restrictions

Newly submitted claims 64-100 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: the present claims are directed towards a method of coating a stent, (Class 424) while the originally elected invention was directed to a stent (Class 623). Since the applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits.

Accordingly, claims 64-100 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Because claims 64-100 are withdrawn, there are no claims to examine and the amendment is considered non-responsive.
